LOOSCALE LIMESCALE REMOVER

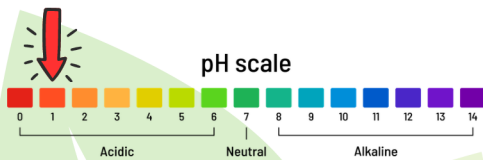

-  Fresh Pine Fragrance
-  Cleans & Maintains
-  Powerful Formula

Description:

ProJanta Looscale is a thick hydrochloric acid descaler and cleaner formulated for powerful washroom cleaning and deodorising. Designed for use in toilets and urinals where scale and deposits can build up over time, it helps restore cleanliness while also tackling unpleasant odours at source by targeting odour-causing bacteria. Its thick formula clings to surfaces for longer contact time, helping improve cleaning performance and making it especially effective on stubborn build-up in hard-to-reach areas. Supplied as a blue liquid with a pleasant fragrance, it combines strong descaling action with a fresher finish after use.

With an acidic concentrate, it should be handled with appropriate care and stored sealed in a cool, well-ventilated area when not in use.

Useful Information:

Product Code:	1021
Product Colour:	Blue
Product Fragrance:	Pine / Floral
pH Level:	1

Directions:

Looscale should be used as a powerful descaling and cleaning treatment for toilets and urinals where scale, deposits and odour build-up are present. For heavy toilet bowl cleaning, first remove the water from the bowl by forcing it over the trap with a mop applicator, then pour the product neat into the bowl and spread it evenly around the surface to maximise contact time. After treatment, flush with clean water and scrub any remaining solution into the water. For regular cleaning, apply the product evenly above the water line, leave for 10-15 minutes, then flush thoroughly with clean water.

For urinals, apply the product to the top of the urinal, scrub the affected areas with a brush or applicator, and then flush with clean water.

After use, keep the container tightly closed and store in a cool, well-ventilated area.
