AUTO BIOLOGICAL BIO LAUNDRY POWDER

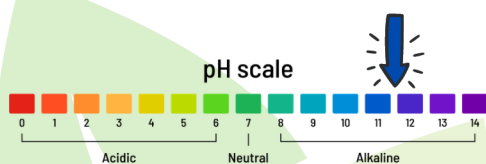

-  Strong Biological Cleaning
-  Delicate Wash Suitable
-  Automatic or Handwash

Description:

ProJanta Auto Biological Laundry Powder 10kg is a biological laundry powder formulated to deliver strong everyday cleaning performance across a wide range of wash types. Suitable for both automatic washing machines and handwashing, it provides effective results on general laundry while also being appropriate for more delicate washes when used correctly. Its dosing system can be adjusted by scoop quantity to suit water hardness and the stage of the wash, helping maintain reliable results under different laundry conditions.

This makes it a practical choice for routine laundering where flexibility and consistent performance are important. For best results, colour fastness should always be tested before use.

Useful Information:

Product Code:	1898
Product Colour:	White w/ Blue
Product Fragrance:	Pleasant Linen
pH Level:	11 - 12
Also available in:	10L, 20L

Directions:

Auto Biological Laundry Powder should be used according to water hardness and the wash stage to achieve effective cleaning results in both automatic washing and handwashing applications.

In soft water areas, use 1 to 1.5 scoops per kilo of washing for pre-wash cycles, or 2 to 2.5 scoops per kilo where no pre-wash is used. In hard water areas, use 3 to 3.5 scoops per kilo of washing. Always test garments for colour fastness before use. Do not soak silk, wool, leather or garments with metal fasteners, and do not use for soaking in enamel baths.

When handling and using the product, protective gloves should be worn, hands should be washed thoroughly after contact, and care should be taken to avoid contact with the eyes.
