BUFF & SHINE FRAGRANCED FLOOR MAINTAINER

-  Slip Resistant
-  Gloss Finish
-  Powerful Restoration

Description:

ProJanta Buff and Shine is a floor maintenance and polish maintainer designed to keep floors looking clean, glossy and well protected in busy environments. Formulated with advanced thermoplastic polymers, it helps restore dull surfaces by recoating and repairing the existing finish, helping floors maintain a smart, well cared for appearance over time. It leaves a flexible, slip resistant layer, making it a practical choice for routine floor care where both appearance and durability matter. Suitable for linoleum, PVC, rubber, sealed cork, sealed wood, terrazzo and thermoplastic floors, it can be used as part of damp mopping or spray burnishing programmes. With its pleasant rose fragrance, it offers an effective and user-friendly solution for maintaining shine, protection and overall floor presentation.

pH scale

Directions:

Buff and Shine should be used as part of a routine floor maintenance programme to help restore gloss, repair dull finishes and maintain a flexible, slip-resistant protective layer on sealed hard floors. Before use, sweep the floor thoroughly and vacuum if necessary to remove loose dirt and grit, particularly where rotary or buffing equipment will be used. For damp mopping, dilute the product at 1:20 with clean water and apply evenly across the floor surface, allowing it to dry fully before burnishing to achieve a high-gloss finish. For spray burnishing, dilute at 1:10 with clean water in the rotary machine solution tank and spray onto the clean floor while buffing. Suitable for use on linoleum, PVC, rubber, sealed cork, sealed wood, terrazzo and thermoplastic floors.

When handling and applying the product, suitable protective gloves and eye protection should be worn, and the product should be stored in a cool, well-ventilated place after use.
