ECO LOGIK WASHROOM CLEANER

-  4 in 1 Action Cleaner
-  Wide Range of Application
-  Maintains & Cleans

Description:

ECOLOGIK Washroom Cleaner is a concentrated 4-in-1 product designed to clean, disinfect, descale and deodorise all washable washroom surfaces. Formulated with a blend of biocides, surfactants and perfume oils, it cuts through body fats, soap scum, limescale and general dirt while leaving washrooms feeling fresh for hours after use. Suitable for tiles, floors, sinks, bidets, baths, showers, fixtures and fittings, it works well as a total washroom cleaner and is also suitable for regular hard floor cleaning to help maintain sanitary conditions.

Supplied as a viscous yellow liquid with a concentrate pH of 2-3, it offers effective performance in both daily and routine deep-cleaning tasks. Available in 750ml spray bottles or 5-litre bulk containers.

Directions:

Washroom Cleaner should be pre-diluted with hot or cold water according to the level of soiling and the degree of cleaning action required. For light cleaning, dilute at up to 1:50, using a stronger solution for heavier soiling, and in stubborn cases the product may be used undiluted where appropriate. Apply using a mop, brush or cloth, working the solution thoroughly into the surface before rinsing or wiping clean. Suitable for use on all washable washroom surfaces including tiles, floors, sinks, bidets, baths, showers, fixtures and fittings, making it ideal for both complete washroom cleaning and regular hard-floor maintenance.

When handling and using the product, suitable protective gloves and eye protection should be worn. After use, keep the container tightly closed and store in a cool, well-ventilated area.

Useful Information:

Product Code:	CG01 / CG011
Product Colour:	Yellow
Product Fragrance:	Lemon
pH Level:	2 - 3
Also available in:	750ml, 5L
